Dear Manager

I wanted to share a bit about myself with you. In 2016, I completed an honours degree in BA Multimedia, which gave me an in-depth understanding of project management and software development. This degree helped me develop various skills such as software and hardware, film, storyboard, graphic design, film and photography editing, animation, photography, web development, 3D modelling with virtual reality, teamwork, and presentation. It broadened my knowledge in these areas and helped me work effectively in diverse teams and communicate with individuals with different skill sets.

After completing my degree, I worked at Cork Deaf Enterprise as a business coordinator and Internship Multimedia for the Central Statistics Offices in Cork. This role allowed me to gain valuable practical experience and enhance my skills. This work is a perfect fit for my skill set and interests.

Following that, I made a conscious decision to embark on a career as a remote web developer, a path that truly excites me. I enrolled in a full-stack software development course at Code Institute, a journey that was both challenging and rewarding. I've acquired a wealth of new skills in software development, and I'm eager to put them into practice in a junior full-stack software development role. My preference for remote work is not just a convenience but a strategic choice that aligns with my background in multimedia studies and my previous experience with remote and hybrid work at Cork Deaf Enterprise.

I am genuinely excited about the prospect of joining your esteemed company and becoming a valuable member of a team that shares my passion for software development. My skills and experience would be a great asset to your team, and I'm eager to learn more about your company and how I can contribute to its success. I've included a link to my portfolio website so you can see my previous work and experiences.

Please note that my portfolio video site does not have audio as it is only a visual motion and animation video. A former colleague and I worked together on audio, and I combined animation and audio to make a film. Please see the link to the animation where I worked in CSO.

Thank you for taking the time to read my cover letter and CV. I look forward to hearing from you soon!

Best regards,
Robert Quinlan

Robert Quinlan

Personal Experience

I recently completed a Full Stack Software Development course with Code Institute. My passion for web development led me to pursue a career as a remote web developer. In addition, I hold a BA Honours degree in Multimedia, which has equipped me with a diverse skillset in graphic design, software engineering, web development, filmmaking, video editing and animation. You can view my portfolio and development projects on my resume site. During my studies in Multimedia, I discovered my strengths in project management, which has further enhanced my skills. Please find the title "Code Institute | Portfolios" section below.

Multimedia Experience

Freelance – Photographic Editor & Animator

Tipperary | Oct 2019 – Mar 2020

- Developing improved communication between staff and their colleagues and customers
- Design and development of both software and hardware for project management
- Delivery of the product prototype
- Developing survey for staff feedback on their experience with the company

Entrepreneur Programme

Rubicon Centre. CIT | Cork | Jun 2016 – Sep 2016

I have completed a course on proposal planning, business research, and writing strategies. As part of the course, I had to deliver an audience presentation that showcased my business idea. My idea was to teach sign language using an e-learning platform. To accomplish this, I designed and developed the user interface (UI), interaction logic, and presentation of sign language using a 3D engine called UNITY 3D and 3D MAX.
